

Dry Beans Program 2008

Including Field Peas

1. LTB products must be applied according to the procedures outlined below:
2. After the spray tank is mixed with other chemicals and/or water, **the pH must be neutral or slightly acidic (pH 7.0 or less)**. LTB products are to be added to tank lastly.
3. If rainfall sufficient to wash off product occurs within 4 hours of application, **re-treatment is required**.
4. Application timing is very important, so **the earlier application is strongly recommended**.

Product Used	Application Timing	Minimum Application Rate	Benefits (as compared to untreated check)
MegaGro	2-5 trifoliolate	2 oz. / acre**	<ul style="list-style-type: none"> • Promotes new root development and more nodules
HappyGro + PhotoGro	Early bloom	2 oz. / acre** of each	<ul style="list-style-type: none"> • Promotes more pods
BOMO + WeatherKing	Early bloom	5-10 oz. / acre** 2 oz. / acre**	<ul style="list-style-type: none"> • Increases grain quality • Increases tolerance to environmental stresses

**** Note:** If application spray volume is greater than 15 gallons per acre, use the dilution rate of 13 oz. per 100 gallons of water.
