

Succulent Beans Program 2008

Including Fresh Peas, Snap Beans, & Edible-Pod Peas

1. LTB products must be applied according to the procedures outlined below:
2. After the spray tank is mixed with other chemicals and/or water, **the pH must be neutral or slightly acidic (pH 7.0 or less)**. LTB products are to be added to tank lastly.
3. If rainfall sufficient to wash off product occurs within 4 hours of application, **re-treatment is required**.
4. Application timing is very important, so **the earlier application is strongly recommended**.

Product Used	Application Timing	Minimum Application Rate	Benefits (as compared to untreated check)
MegaGro	2-3 trifoliolate	2 oz. / acre**	<ul style="list-style-type: none"> • Promotes better root development and more nodules
HappyGro + PhotoGro + BOMO	10-14 days after MegaGro and repeat as necessary	2 oz. / acre** of each 5-10 oz. / acre	<ul style="list-style-type: none"> • Promotes pod set • Potentially increases bean size and weight
Weather King	21-28 days after MegaGro application	2 oz / acre **	<ul style="list-style-type: none"> • Increases tolerance to environmental stresses

**** Note: If application spray volume is greater than 15 gallons per acre, use the dilution rate of 13 oz. per 100 gallons of water.**
